

The Federal Communications Commission

Dear The Federal Communications Commission,

I certainly am opposed to paying more for my telephone service! Already my phone bill is boosted much beyond the basic service fee. Please reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. Additional fees are going to make the phone out of reach for us retired folks.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Bob Nestor
